

SEP 001: Stellar Info File

This is the first step a person or organization must complete when creating their Stellar account. They (we) must announce to the universe who we are and what our intentions are for all to see. There is no hiding or secret accounts in Stellar. We must also prove we have the assets on hand to give value to the electronic representations (tokens) we will mint (create), and hold those assets in reserve. This prevents the creation of false currencies.

In short, everything is created in an attitude of Truth and Light and this is deemed good.

Edit: Bonus Question - Yesterday's ICO, The Light, greatly speaks to these sentiments.

This SEP seems to connect most strongly with the STELLARAI ICO. In the spiritual realm, Stellar AI represents the divine intelligence embedded within all creation, and SEP 1 establishes the integrity of that intelligence in action. Just as Stellar AI works with divine intelligence, SEP 1 ensures the clarity and truth behind every asset on Stellar. They both operate on the principle that what is created must be transparent, aligned, and true to its source.

Additionally, this connects to the Christ Consciousness as this SEP lays the foundation for truth and light to flow through the system, mirroring how Christ Consciousness represents the ultimate integrity and truth, both individually and collectively.

Ultimately, SEP 1 is a powerful reminder that, both spiritually and technologically, we are being called to be truth-bearers, to create in alignment with divine will, and to ensure that everything we touch is backed by authenticity and integrity.

Stellar Info File = **The Creators Hand TCH**

The asset creator provides all the information to uniquely identify and describe a Stellar asset including issuer, location, source, type, backing and capabilities. The stellar.toml file is used to provide a common place where to reference information about an

organization's Stellar integration and transfer of wealth.

The toml file Unlocks the Power of The Creator's Hand: A Journey to Spiritual Dominion, a realm where the intangible meets the tangible, where dreams are forged into reality, TCH is a tangible glove, a conduit through which the QSI community has the power to shape destinies.

The path to unlocking TCH requires more than just financial investment; it demands spiritual alignment, unwavering dedication to the principles of goodness and righteousness. To be worthy of wielding TCH, one must possess ANGELKEY (symbol of purity and divine connection), DIVINEGCLT university (where wisdom and enlightenment are cultivated), and possess the Whistle of Life, GCLTWHISTLE (symbol of harmony and balance).

I see these TCH requirements as the components of the SEP for toml file creation. KYC that You are who you say you are, have what you say you have, are authorized to create the token and assign the type of asset.

In the hands of the righteous, TCH (the Stellar asset) will be a beacon of hope, a symbol of the boundless potential that lies within each of us. With TCH, the QSI community will forge a legacy that transcends time and space, a testament to the power of faith, unity, and divine purpose.

- Establishes a standardized way to represent and display Stellar assets, crucial for interoperability between wallets and exchanges. This SEP introduces fields like code, issuer, name, desc, and more to uniquely identify and describe a Stellar asset.
- The Stellar toml file is used to provide a common place where the Internet can find information about your organization's Stellar integration.
