

BY **NEW ERA**

Back in April 26th, Bernard Baruch introduced us to Asteria Mining Solutions, a groundbreaking project enabling resource extraction from asteroids and celestial bodies.

The technology combines innovation, robotics, and cutting-edge equipment for precise and efficient mining.

The vision includes accessing limitless cosmic riches, meeting energy needs sustainably, and ensuring responsible stewardship.

The focus is on equitable resource sharing and using celestial resources for the betterment of humanity.

??????????

Imagine a future where the limitless riches of the cosmos are within our grasp, where the vast reaches of space become a treasure trove of precious metals, rare minerals, and untapped resources. With Asteria Mining Solutions, this vision becomes a reality

<https://t.me/QuantumStellarInitiative/38205>

With each ICO project we are promised advancements in various scientific fields through the extraction and analysis of the various metals .

This is more than an investment opportunity.

We are being invited to participate in shaping the destiny of humanity by exploring space's uncharted territories and utilizing the resources for an exciting prosperous new future

??? ?? ??

??????????

The importance of metals, minerals, and commodities is that it is basic ??????

Stuff needed to build, repair, heal, create energy, etc

We know these are the building blocks for construction, and we've also seen how these are the materials needed for healing too

<https://t.me/QuantumStellarInitiative/40064>

The Devs have confirmed that we cannot replicate minerals

Some things can't be replicated thus they remain in their original form forever ???

- Ivan

????????????

This is why they must be mined.

**The biggest interest there is the metals, not the money.
Money are backed by metals So, who has more metal - have more power
And the QSI fund will have a lot
And it's only the start
Heheh
You'll see after the RV
Everything is connected
- WHH ????????**
